

SEALED INK CUP 90 Q Pad Printing Machine

- Transverse doctoring pad printing machine
- Excellent price/performance ratio
- Low-maintenance
- Process reliability
- User-friendliness
- Touch panel 4"
- Including machine base frame

Ergonomic manual workstation with transverse doctoring unit

The solution for long and narrow print images

The SEALED INK CUP 90 Q consists of proven TAMPOPRINT technology and is the entry-level model from our portfolio of transverse doctoring pad printing machines. It is designed for applications that require a long print image, such as catheter printing, oblong covers or housing parts. With a good basic equipment this standard machine offers an excellent price/performance ratio.

Compact design

The SEALED INK CUP 90 Q is a single-color pad printing machine for the realization of oblong print images that are larger than the ink/doctoring cup used. Designed as an entry-level model, this machine offers a good basis for a variety of applications.

As basic equipment this pad printing machine contains a base frame with practical storage space. This also ensures a stable stand and leads to high stability during the printing

Standard drawer with integrated profile plate for workpiece insertion (left in picture)

process. Flexibility is provided by the height-adjustable angle table, which allows quick changeover to components of different sizes. In addition, a drawer into which the workpiece is inserted provides additional protection for the user.

The user-friendly touch panel is standard on all new TAMPOPRINT machines. Many machine parameters and functions can be controlled and set on the display.

Optional ink residue pick-up system (right in picture)

The SEALED INK CUP 90 Q is prepared for the installation of an ink residue pick-up system.

Options

- Ink residue pick-up system
- Cross support

Accessories

- Adapter angle for cliché sizes 70 x 510 mm und 70 x 710 mm on request
